Full Stack PHP Developer

The company are a long established and growing Bury based technology organisation. We currently offer a range of technology solutions and are expanding our small team of designers and developers. The growing team will offer web and software solutions to a variety of reputable SME clients.

The role of Full Stack PHP Developer you'll play a critical role in ensuring the success and scalability of the products/services and overall Telemedia platform and will have the opportunity to influence and inform its direction.

Due to the nature of this role, the successful candidate will have extensive exposure in working alone or within teams, consuming APIs, website/software development and overseeing projects from conception to completion. You will be an excellent communicator as some client facing will be required.

Key Skills:

- Advanced PHP Experience
- Good working knowledge of HTML, CSS, JavaScript, JQuery
- Relational databases (MySQL)
- Experience creating and consuming APIs
- Version control with Git
- Experience of Adobe CS (Photoshop / Illustrator)
- Browser and device testing, debugging, and utilising developer tools
- Server administration: Linux (Ubuntu, Debian), Apache

The role offers competitive salary and additional benefits, including 21 days holiday plus bank holidays.
